

MANUFACTURER OF CUSTOM MADE DESIGNER HANDCRAFTED FANS SINCE 1999

The Fan Studio has its origins from 'TULLU', a leading brand which began its success with the manufacturing of water pumps. It was founded by Late Shri Vijay Kumar Sah in the year 1958. Earnest efforts and quality production led TULLU to grow in size and it was widely held to be a brand signifying excellence, reliability and efficiency. TULLU has registered several awards, honours and recognitions for its products and export.

Following the success of TULLU, Mr. Shishir Kumar Sah, expanded his vision and engaged in the setting up of a new company by the name of "Tullu Domestic Appliances" where qualified and innovative engineers looked into the performance, quality and stability of different products such as "Booty" mixer and grinder, exhaust fans, coolers, standard ceiling fans and table fans.

It was the accomplishment of these two companies that encouraged the dedicated founder and product designer Mr. Shishir Sah to dwell into his creativities and come up with the idea of manufacturing Handcrafted Designer fans. His pioneering efforts lead to the birth of India's first company to manufacture handcrafted designer ceiling fans. Conceiving fans as not just a utility appliance, he elevated fans to a level of status definers by letting customers explore their own ingenuity in choosing a designer fan. He brought exquisite traditional Indian art work such as Agra's intricate marble inlay, Jaipur's striking and fine metal carvings, glorious woodwork of Saharanpur, etc. in every single piece of the fans that he designed. What makes these fans user friendly is the advanced technology of functioning, making these designer fans not just look amazing but also work exceptionally well.

With time, designer fans assumed the category of luxurious lifestyle. Keeping in view such developments, this enterprise launched "The Fan Studio", a channel for design oriented fans under the major classes of Classic, Contemporary and Colonial designs.

What makes it distinct is that The Fan Studio is the sole brand of fans in India where fans are redone as per the customer needs. Be the customization in the understanding of the interiors of the room or an exceptional inclination of some masterful work, The Fan Studio ensures that the customer inclinations are soaked up on the fans creatively.

In 1960, our founder grandfather, made products which were unmatched in quality and workmanship. We have maintained our tradition of Quality and Human touch into all our products; creating classic designs and products which reflect our true passion for timeless tradition of manufacturing.

Care is taken at every step of manufacturing; it is never easy to make a product which can stand the test of time. Visual and performance inspections are done after every major assembly step to ensure longevity of the product.

Human touch is the key; every part of the fan is handmade. Best raw materials are bought to Varanasi; the oldest living city in the world, to be transformed into a classic product which will serve its owner for a lifetime to come.

Skilled craftsmen, die makers, engineers work in a team to constantly create and design new products. We have made custom design products for our esteemed clients.

GENERATIONS OF QUALITY MANUFACTURING

- 18 Pole Heavy Duty Stamping
- High temperature class insulations, eliminates motor burning
- Tropical class rated motor (low temperature rise) for longer bearing and motor life
- Rubber Sealed Double Ball bearings for longer life and smooth operation
- All metal rugged construction
- Thick Metal blades
- High volume Air delivery to cool large areas
- Hand Liquid Spray painted fans for that classic look.
- Corrosion protected, triple layer painted parts remain good as new after years of operation.

- Shaded Pole Motors for lifelong trouble free performance
- Hand wound, superior grade copper coils
- Fiber Glass insulations for added safety
- Tropical class rated motor (low temperature rise) for burn free motor life.
- Mechanical hand operated speed regulator
- All metal rugged construction
- Phosphor Bronze bush bearings, for life long trouble free operation
- Hand Riveted Mesh guards with over 400 rivets per set.
- Liquid Hand Sprayed imparts fans with a classic sheen
- Paint cured in Clay ovens, maintaining a century of traditional manufacturing practice
